C.A.Technologies offers a wide variety of conventional air spray guns designed for porcelain enamel and ceramic applications. The bodies are all forged aluminum built with all stainless steel fluid passages. These spray guns come standard with a carbide fluid nozzle and needle that are able to withstand even the most abrasive materials. They are available in pressure feed, gravity feed and automatic versions, and can be outfitted with our 2.5 gallon or 5 gallon pressure tanks. With any of our 5 gallon outfits, a 5 gallon pail can be placed directly into the pressure pot. You can be confident that all your project needs will be achieved with this spray system.

FEATURES

- ◆ Carbide Needle and Nozzle Designed for Ceramic Materials
- ◆ 100 Series Carbide Needle and Nozzles available in 1.8 mm, 2.2 mm and 2.8 mm
